

**BI03176 – Animal  
Behaviour  
Key Words Development**

Generalization  
Specialization  
Environmental predictability

Nature vs. nurture  
Honey Bee  
Foragers  
Nursing  
Hive maintenance  
Microarray gene analysis  
Stimuli  
Ethyl oleate  
Regurgitated nectar  
Genetics of learned behaviour  
Great Tits  
Blue Tits  
Imprinting  
Cross-fostered chicks  
Kin-recognition  
Nest odours  
Facial recognition  
Genetic differences  
Redstarts  
Single-gene effects  
Knock-out mutation  
Genotype-phenotype interaction  
Rover drosophila  
Sitter drosophila  
Bilateral symmetry  
Damsel fly  
Fitness effects of development  
Good genes hypothesis  
Good parent hypothesis  
Facial symmetry  
Learning  
Sexual mimicry  
Pseudocopulation  
Pheromones  
Orchid  
Wasps  
Intersexual differences  
Pinyon Jay  
Nut cache  
Hippocampus  
Spatial skills
